SUSTAINABILITY FEATURES

100% RECYCLABLE RECHARGER

REFILLABLE DESIGN

ENDLESS-REUSE ALUMINUM

Our sustainable packaging is designed to meet the most progressive standards in the industry including those of CREDO, SEPHORA, and ULTA.

CUSTOMIZATION - COLORS

Although the outer shell is made from aluminum, it doesn't mean that product's look has to be plain. UA is able to achieve endless customization possibilities with kinds of decorations to turn the versatile packaging model into a distinctive beauty product, as well as to create an eye-catching identity.

CUSTOMIZATION - FINISHES

Color is a key element in presenting the image and identity of the product, but the problem is that it is not a complete design and is not yet ready for launch. We offer a variety of finishes, including matte, varnish, or premium metallic effects, to help you express your brand message more precisely.

CUSTOMIZATION - PRINT

At last, this aluminum component is available for custom branding by screen printing your brand's logo and product highlights.

THANKS!
