

# A Trusted API CDMO Partner

**Always Aligned**

## We're what you're looking for in an API CDMO

Wavelength Pharmaceuticals has a 34 year track record in development, commercial scale production, and consistent supply of high-quality APIs. We serve more than 280 customers in 50 countries and produce more than 630 metric tons of commercial products every year. As a completely independent API company, with a long heritage of excellence, we're a reliable partner who you can trust to put your interests first.

## Always Differentiated

We are experts in complex chemistry, process development, optimization and scale-up, enzymatic reactions, crystalline forms, micronization and particle design, spray drying and other bioavailability-enhancing solutions.

We have developed dozens of robust commercial scale processes and are capable of delivering on a wide range of product requirements including highly potent APIs, steroids, cytotoxics, controlled substances, injectables, and other complex dosage forms, such as dry powder inhalers, metered dose nasals, semi-solid topicals, and transdermal patches.

## Always in Full Compliance

We have an exceptional regulatory track record with all leading global regulatory authorities (USFDA, EU-EMA, PMDA, TGA, KFDA, ANVISA, COFEPRIS and others).

Our highly skilled team has completed over 100 successful customer and health authority audits in the past 5 years, including two recent USFDA and EU GMP audits completed with no observations. Our expertise extends to our ability to deliver on regulatory requirements in more than 50 different countries to support your global commercialization strategy.

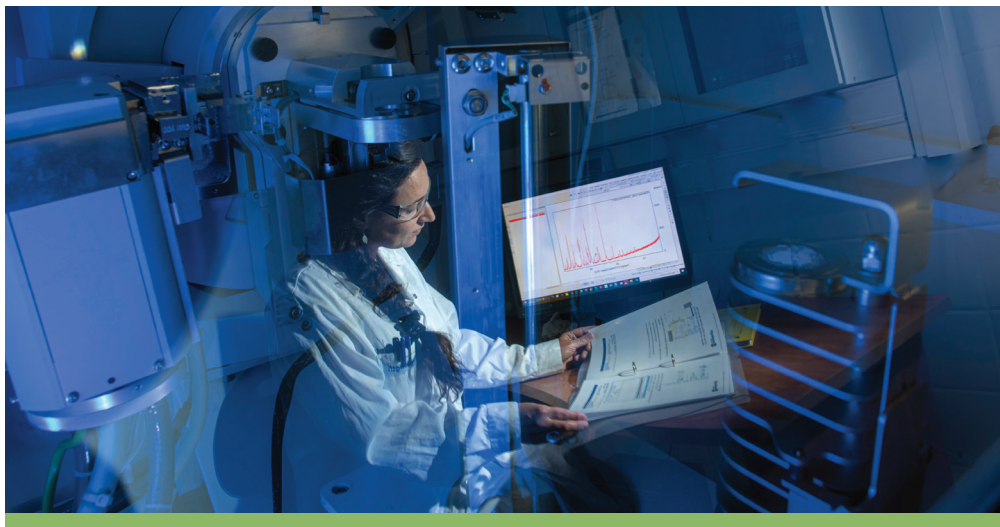

## World-Class Manufacturing at Every Scale

Wavelength offers state of the art, world-class manufacturing capabilities at every scale – from pre-clinical grams to multiple tons commercial scale. Total reaction volume of 155m<sup>3</sup>, 84 reactors ranging 10L-12,000L including stainless steel, glass-lined, hastelloy and high pressure hydrogenators up to 50bar. We handle a wide range of complex chemical reactions including Enzymatic reactions, Heterocyclic synthesis, Brominations, Nitrations and Sulphonations, Cryogenic reactions (-70°C to -85°C) with high containment capabilities including production of high-potency APIs, steroids, cytotoxics and highly controlled substances complying with the strictest environment, health and safety standards (up to OEB 5, <1µg/m<sup>3</sup>). Our multipurpose manufacturing facilities provide high flexibility with available capacity and various expansion options to quickly and efficiently meet all our customers' production needs including backward integration capabilities for starting materials and advanced intermediates supply chain assurance.

### Wavelength CDMO Services

- Technology Transfers
- Process Development & Optimization
- Enzymatic Process Development
- Analytical Methods Development
- Synthesis of Impurities and Standards
- Potential Genotoxic Impurities Evaluation including High Sensitivity Analytical Methods
- Solid State Research (Polymorphism screening / Salts / Co-Crystals)
- Particle Design & Micronization
- Spray Drying & Bioavailability Enhancing
- Scale Up, Process & Analytical Methods Validation
- cGMP Manufacturing - Grams to Multi Ton Scale, APIs, Advanced Drug Intermediates and Key Starting Materials

## An Unrivalled Commitment to Service

At Wavelength Pharmaceuticals, we look at our customers as long-term partners. We work with customers collaboratively, providing full transparency at every phase of a project, and we have an excellent track record of delivering on time and in full, meeting or exceeding customers' expectations.

At the heart of our operation is a highly experienced and accessible management team that puts customers first. We strive to be on the same wavelength with our customers – a partner in tune with your goals and API needs.

Contact us to learn how we may tailor a customized solution to meet your individual API development and manufacturing requirements.
