

Gyneos

D-Chiro-Inositol

SUPPORTING WOMEN'S REPRODUCTIVE HEALTH AND FERTILITY

Solutions for the stages of a woman's life

● About Gyneos

Gyneos® is made with the natural compound D-chiro-inositol, also known as DCI, which is a natural inositol extracted from carob pods.

According to human and preclinical studies, DCI offers a bioactivity that is different from other inositols, improving fertility by restoring age or polycystic ovary syndrome (PCOS)-associated impaired fertility. In addition, its insulin sensitizer effect helps to support a better control of blood glucose levels, frequently associated with PCOS, obesity and aging.

DCI is suitable for a wide variety of applications and is mostly used in dietary supplements. We offer a 98% pure product produced with late state-of-the-art downstream technologies, using only a water-based process without using any organic solvent. Here you have a genuine natural, ecological and women's health-oriented product.

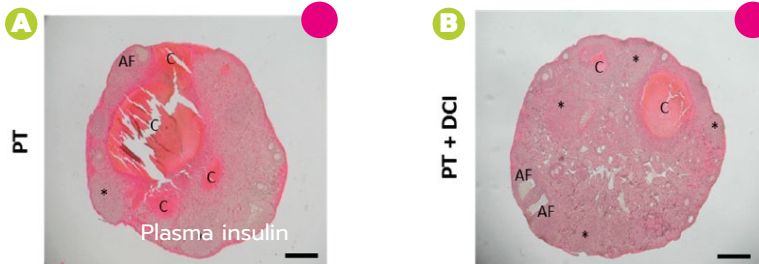

Gyneos helps a woman to get back to her natural cycle

- Improves fertility in late reproductive-age women
- Reduces PCOS-associated infertility
- Reduces PCOS-associated insulin resistance and androgenism
- Weight control in obesity
- Blood glucose control
- Bone health in aging woman
- Skin tanning

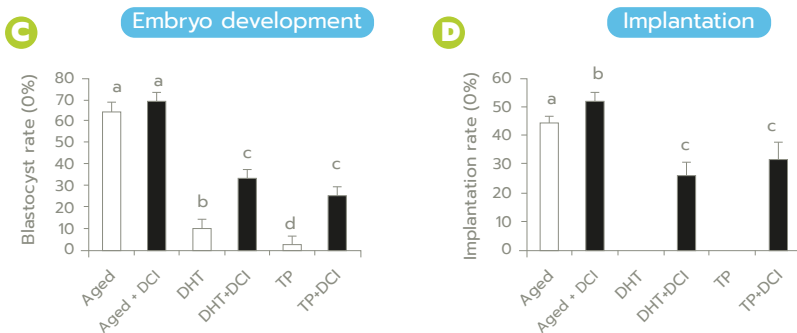

Restoring the reproductive cycle

Study/research

Polycystic ovary syndrome is a major cause of infertility in women, and its commonly associated with insulin resistance, diabetes type 2, obesity, androgenism and subsequent hirsutism, severely impacting the reproductive cycle of young women. Preclinical studies demonstrated that Gyneos reversed this condition, identifying key molecular targets for this improvement:

Administration of Gyneos (98% pure DCI, improves (B) the ovary damage present in androgenized (A) female mouse (PT, DHT). This effect is associated with greater number of developing embryo (C) and implantation (D). In addition Gyneos improves diabetes present in this PCOS animals. (From Pericuesta et al. Int J Mol Sci. 2020 Aug 22;21(17):6049.

Gyneos active ingredient (DCI) has been demonstrated to improve/restore ovulation in women suffering PCOS, reversing infertility in a relevant percentage. Gyneos is the only natural pure DCI available for human treatment, in comparison with other synthetic non natural/ecological products.

Properties

Made in EU

Vegan

Vegetarian

Gluten free

Non GMO

Pesticide free

No solvents

Sourced directly from farmers

Reduces PCOS

Increases fertility

Skin tanning effect

Satiating effect

Blood glucose control

Mental illness help
