

*EVOLVED BY NATURE

Activated Silk™

8A-α

INCI: SOLUBLE FIBROIN

It's like natural exfoliation,
from the inside out.

A more natural solution to improving appearance of hyperpigmentation

Gentle enough for everyday use

Supports increased late stage cell differentiation

Suitable for sensitive skin

Increases appearance of skin brightness

Suitable for use in the sun

Visibly calms and soothes redness

Easy to formulate with

Upcycled.
Naturally-
derived.
Powerful.

- Made from upcycled materials
- Biodegradable
- Made from a renewable resource
- Supports a circular economy
- Not formulated with petrochemicals
- Activated Silk™ is a sustainable technology platform*
- Non-gmo, cruelty free
- Made with renewable energy

*Activated Silk™ as an environmentally responsible technology developed with good work practices, which contributes to achieving U.N. Sustainable Development Goals. For info, visit <https://sdgs.un.org/goals>.

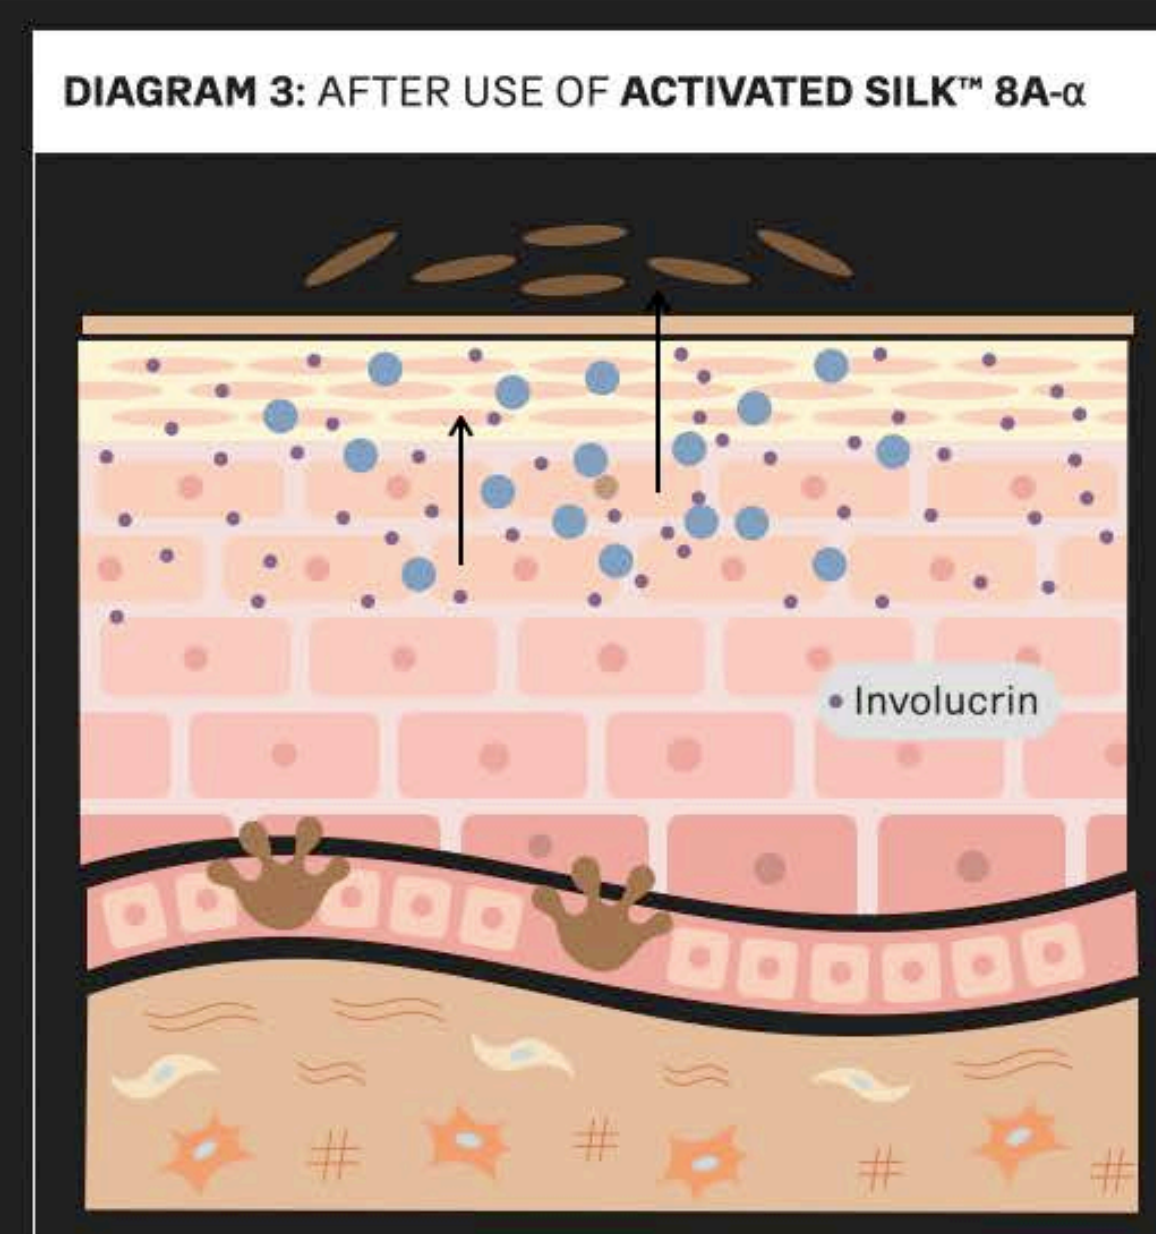

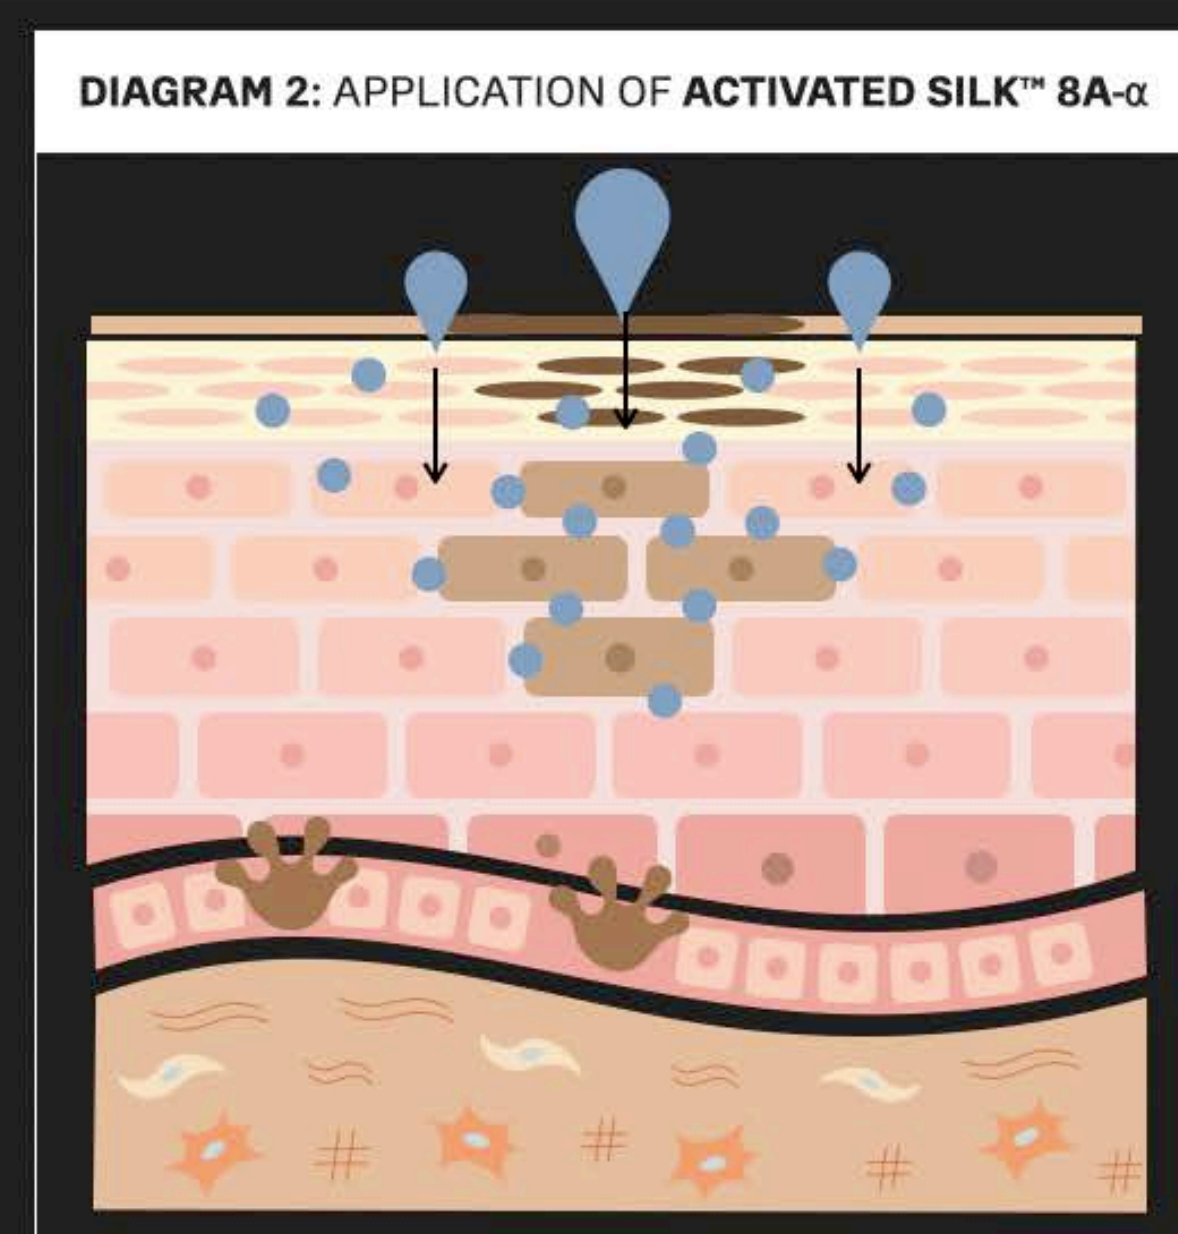

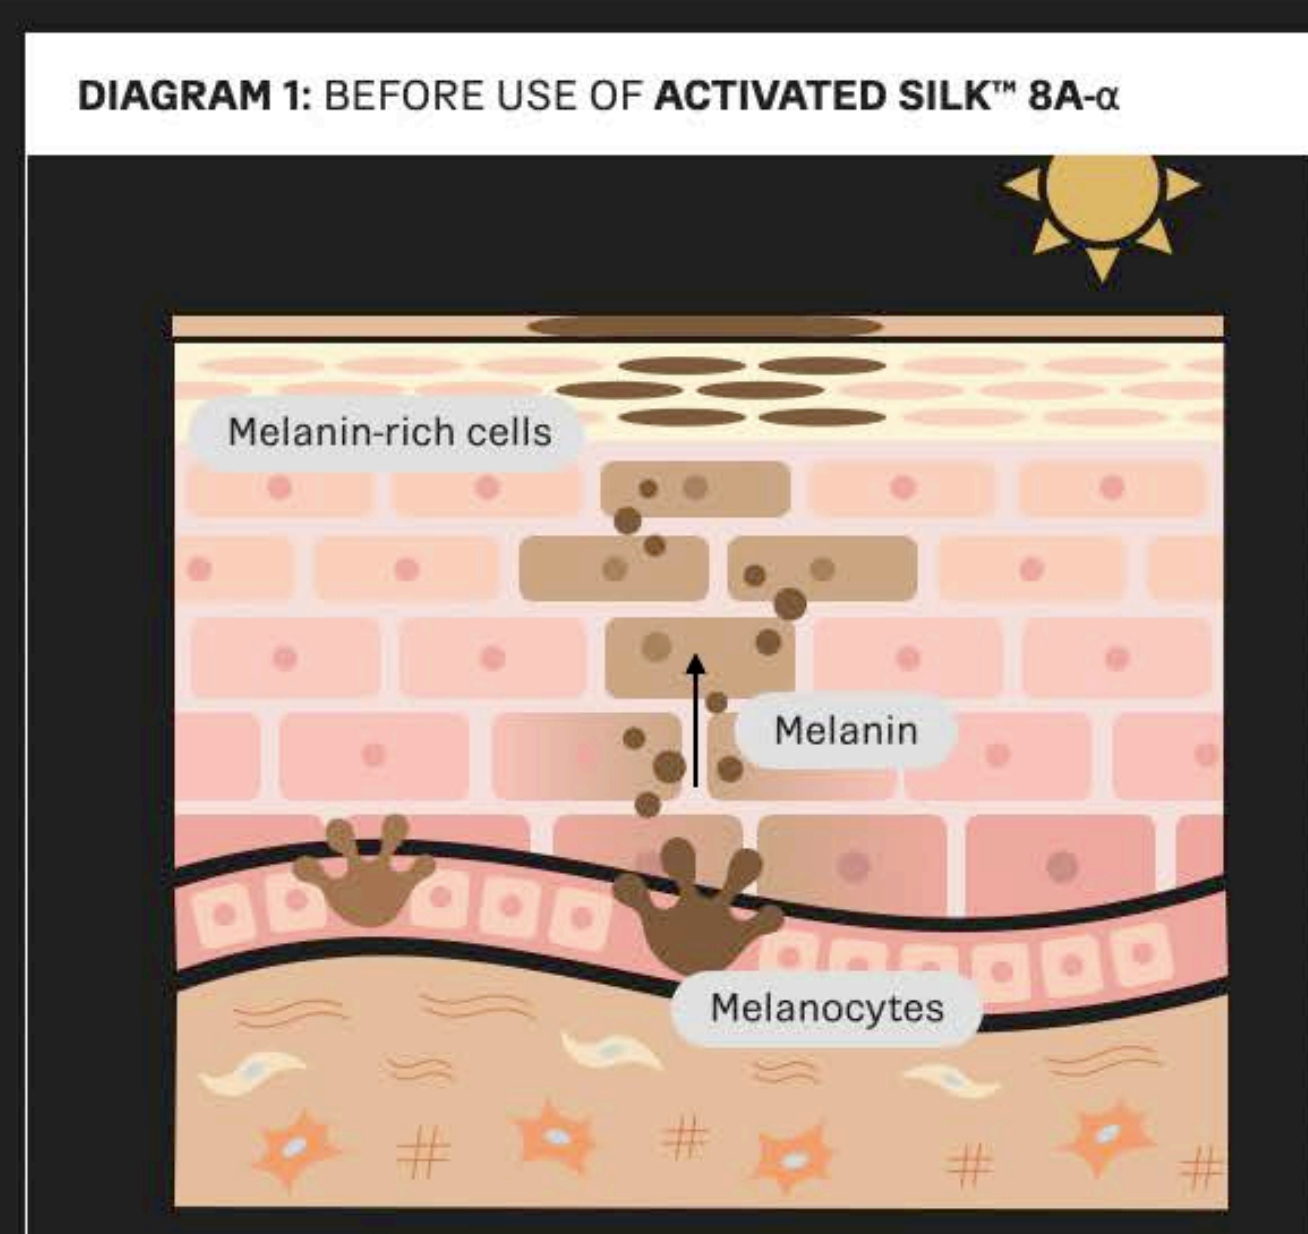

Activated Silk™ 8A-α supports late stage cell differentiation

The outer most layer of the epidermis, where late stage differentiation occurs, also happens to be where the damaged and hyperpigmented cells are found. By supporting the area where these old, overly melanin-rich spots live, the body is more rapidly able to push them up and out through the cornified layer, replacing them with new healthy cells.

Scientifically developed for safety.

- Safe for sensitive skin (no risk of damage found with other exfoliants or acids)
- Safe for use in sun (won't degrade in UV like vitamin C)**
- Safe for use around eyes
- Stable in formulations
- Hypoallergenic
- Non-toxic, non-carcinogenic, non-mutagenic

**Pending clinical trial.

Pioneers in natural peptide discovery.

CLINICALLY PROVEN AND SCIENTIFICALLY EXPLAINED AT [BIOACTIVES.EVOLVEDBYNATURE.COM](https://bioactives.evolvedbynature.com)

Activated Silk™

8A-α

INCI: SOLUBLE FIBROIN

Clinical Study

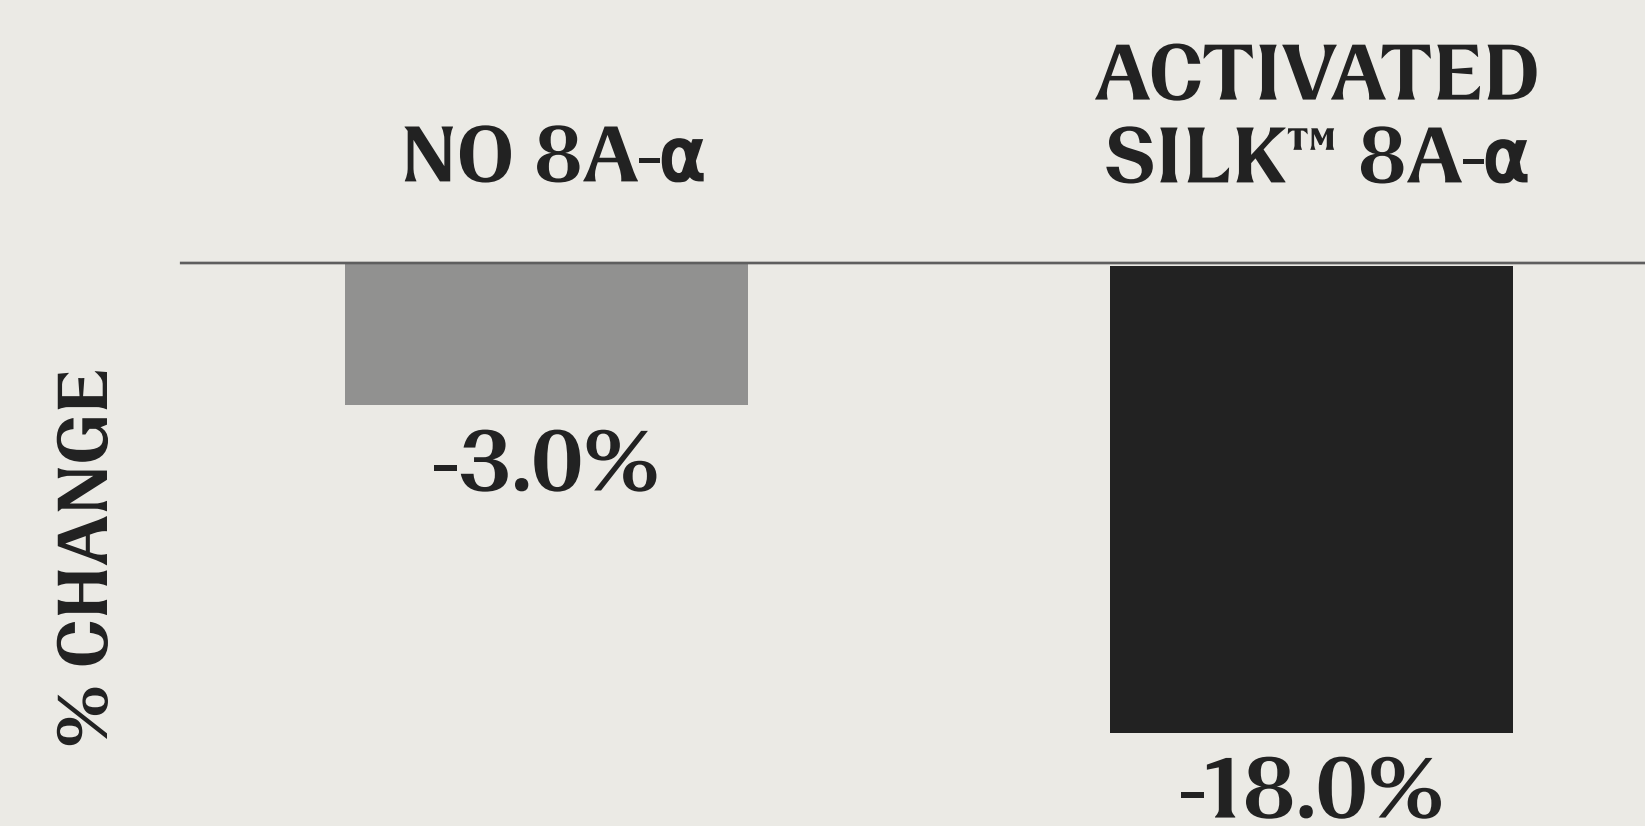

Remarkable improvements in skin appearance

100%

of participants demonstrated improvement in appearance of hyperpigmentation*

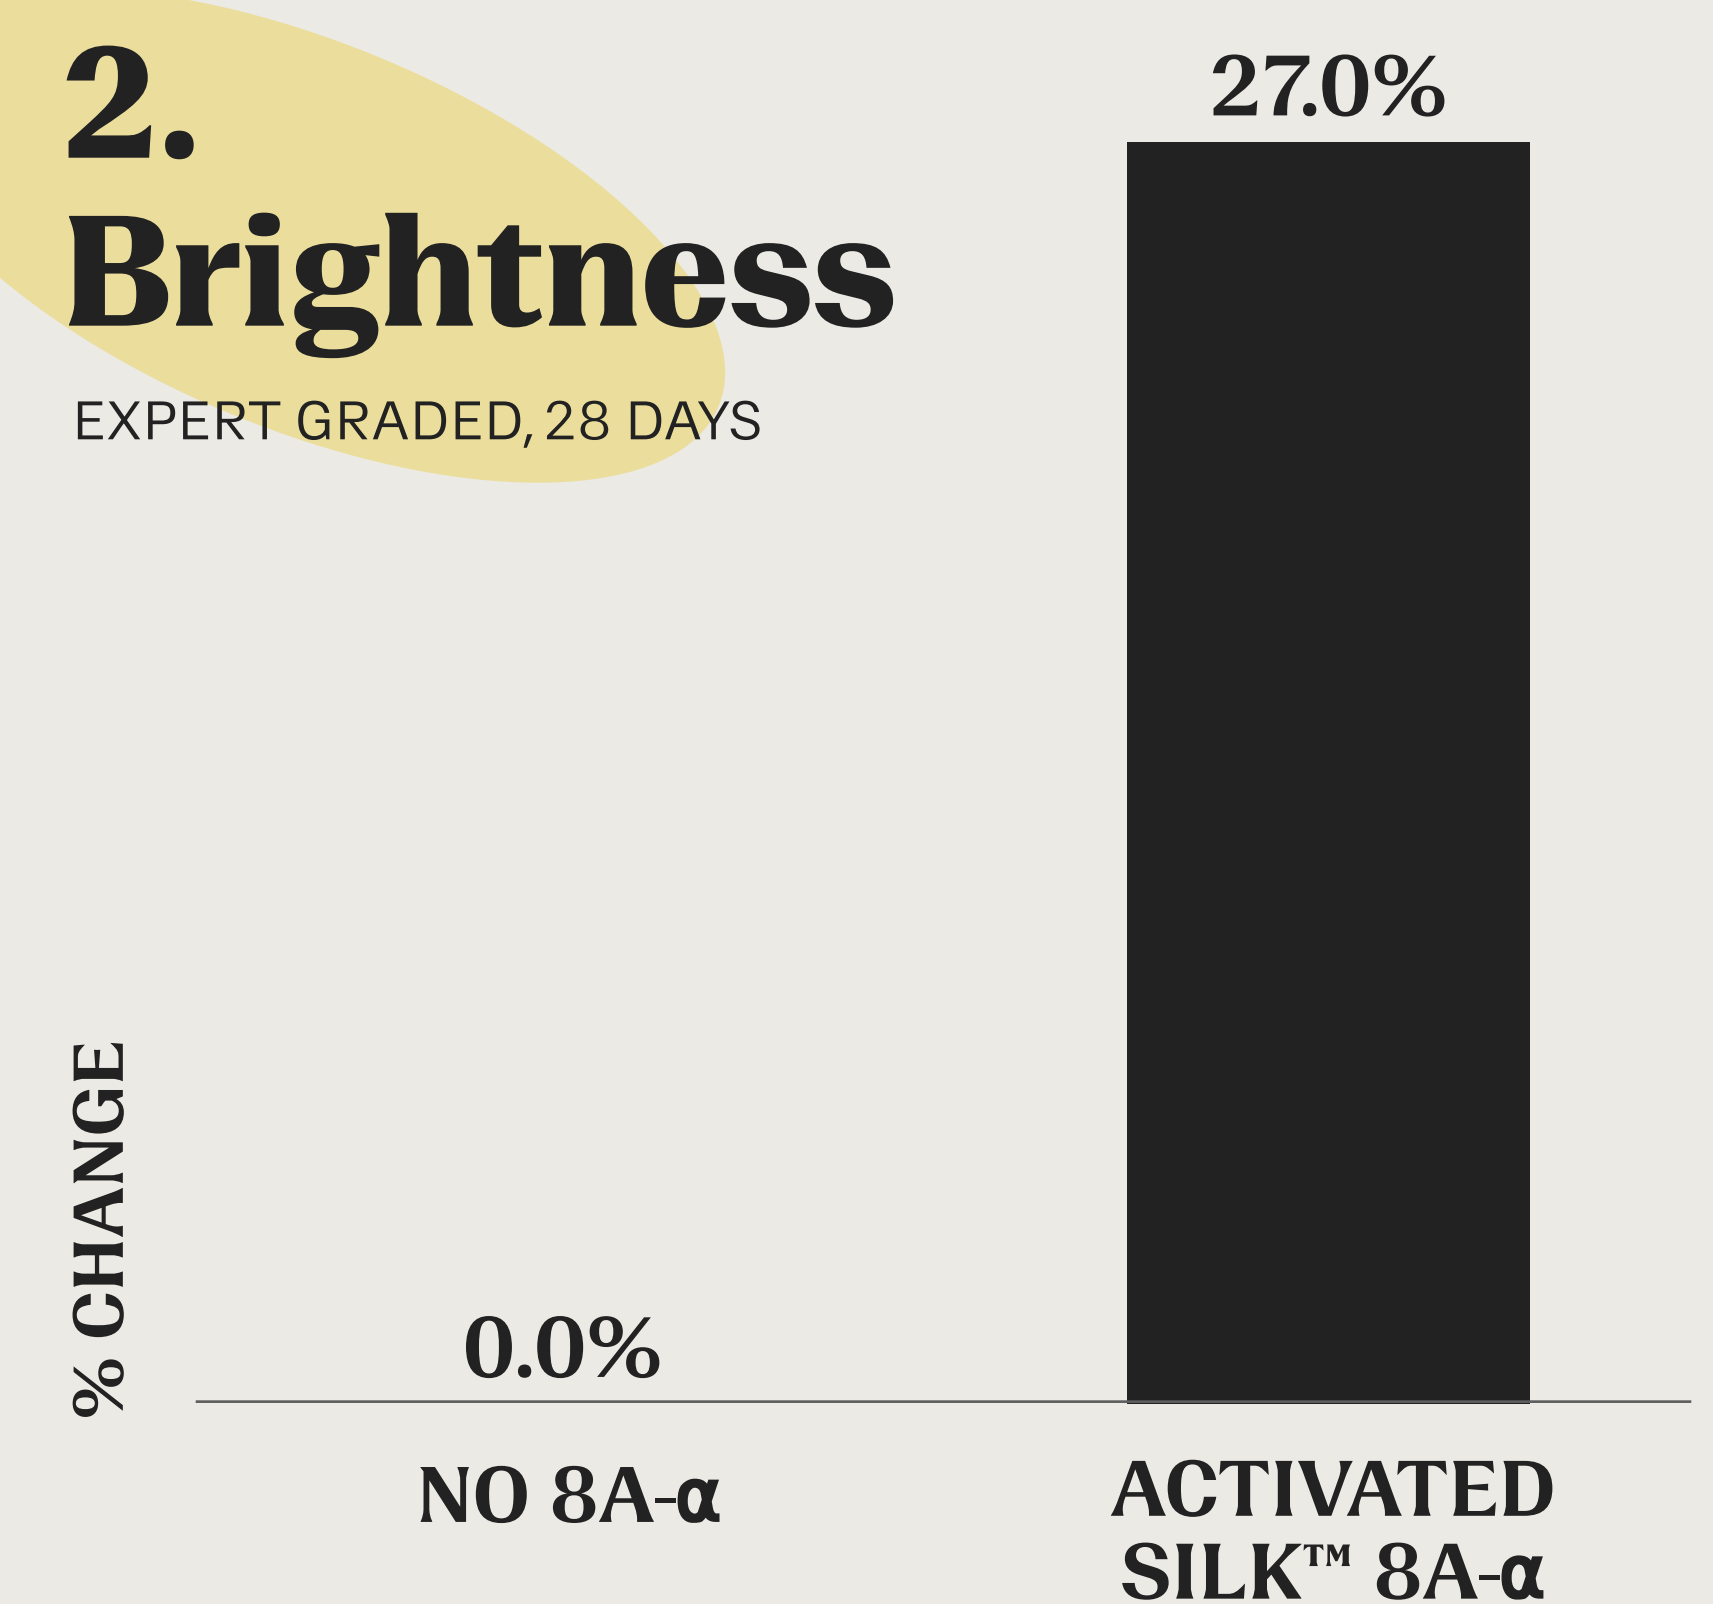

1. Hyperpigmentation

EXPERT GRADED, 28 DAYS

2. Brightness

EXPERT GRADED, 28 DAYS

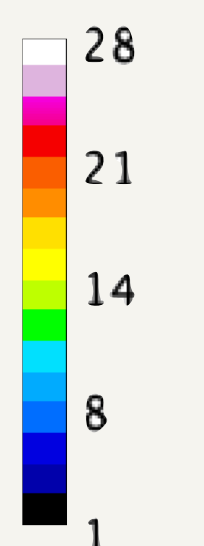

*Based on RGB color analysis, change assessed across 3 areas of the face - the forehead, cheek and chin; 15 participants demonstrated improvement in at least one of these 3 areas treated with 8A-α.

3. Image Analysis

Measure of the ratio of red light vs. green light reflected from skin

The higher the value on a color scale from 1 (black) to 28 (white) indicates the total level of skin tone above normal levels.

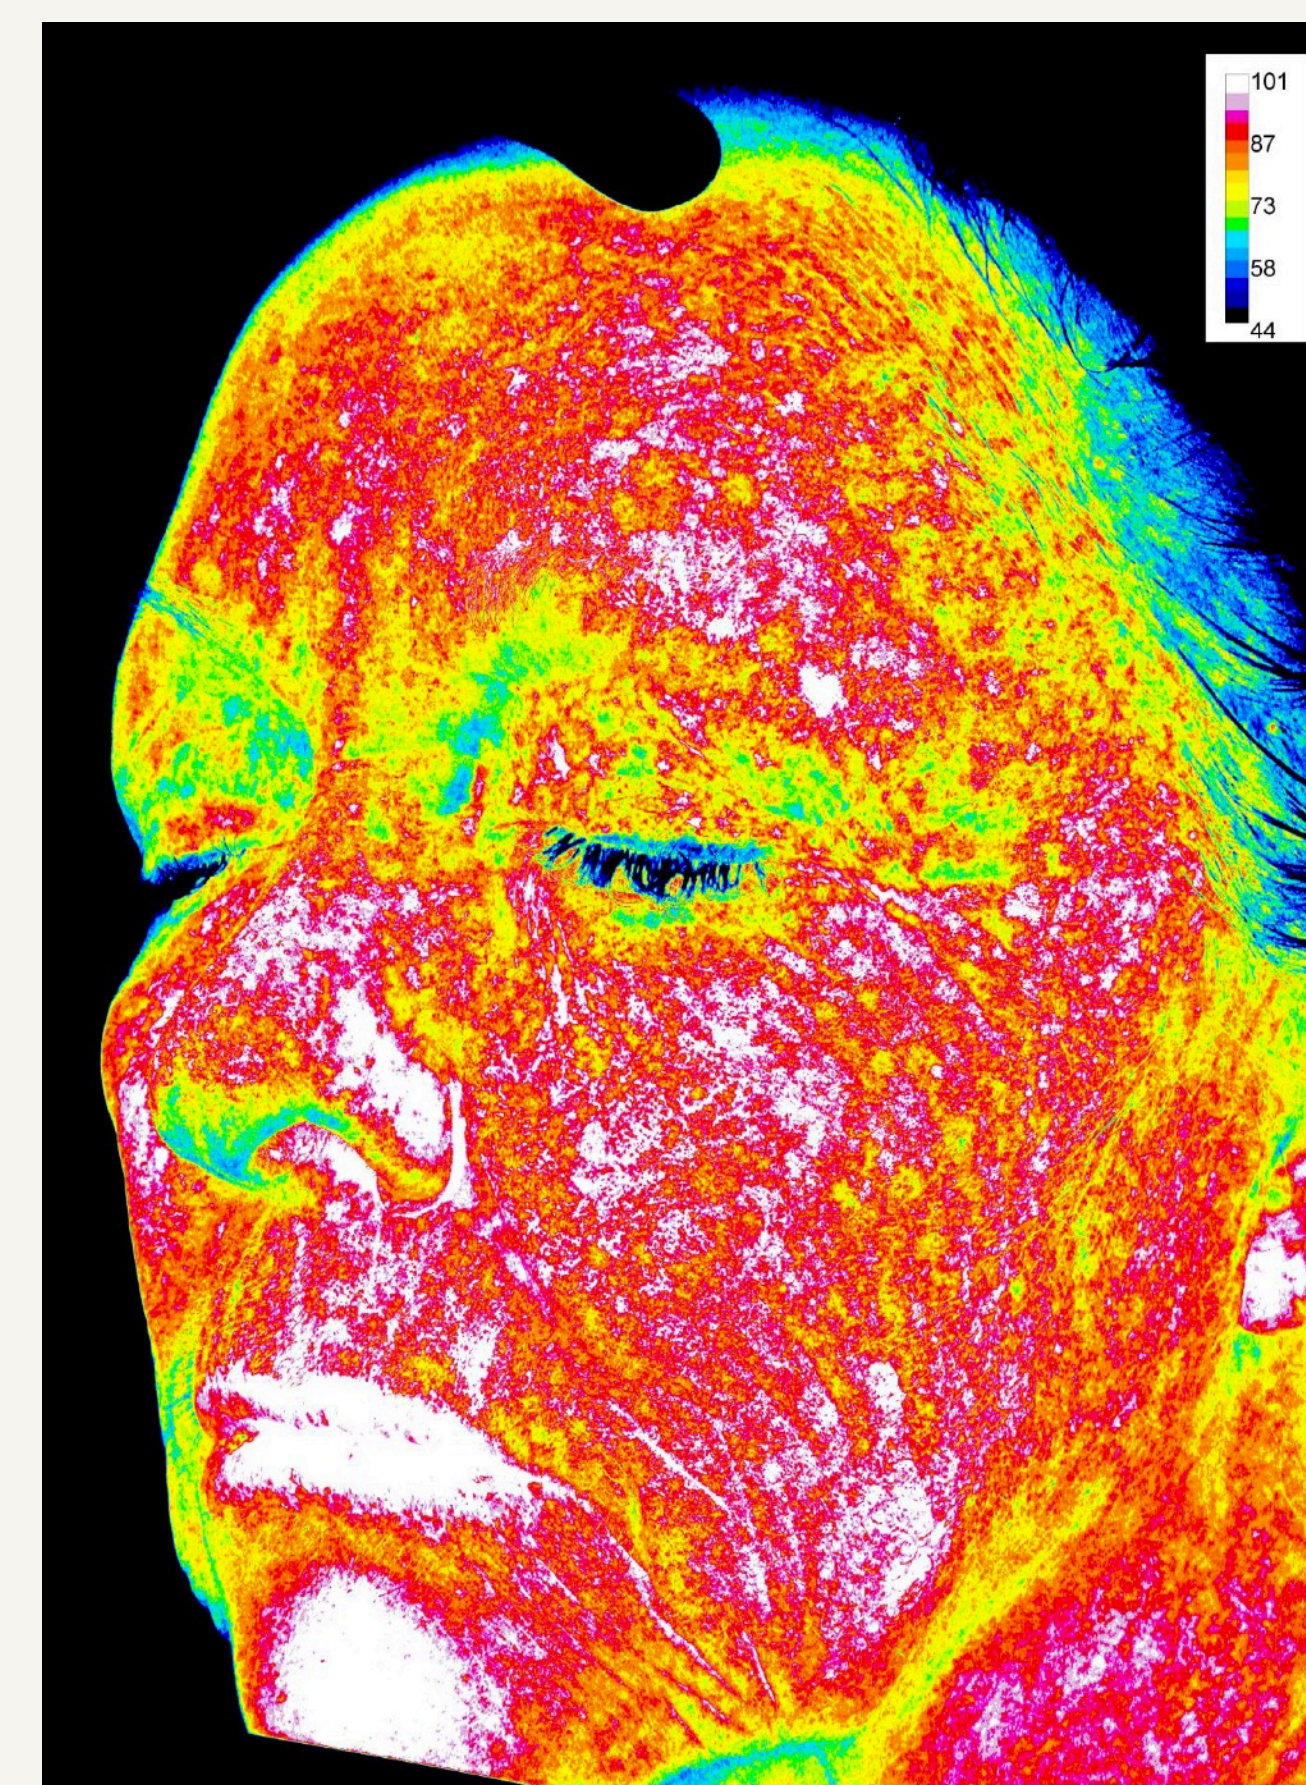

BEFORE

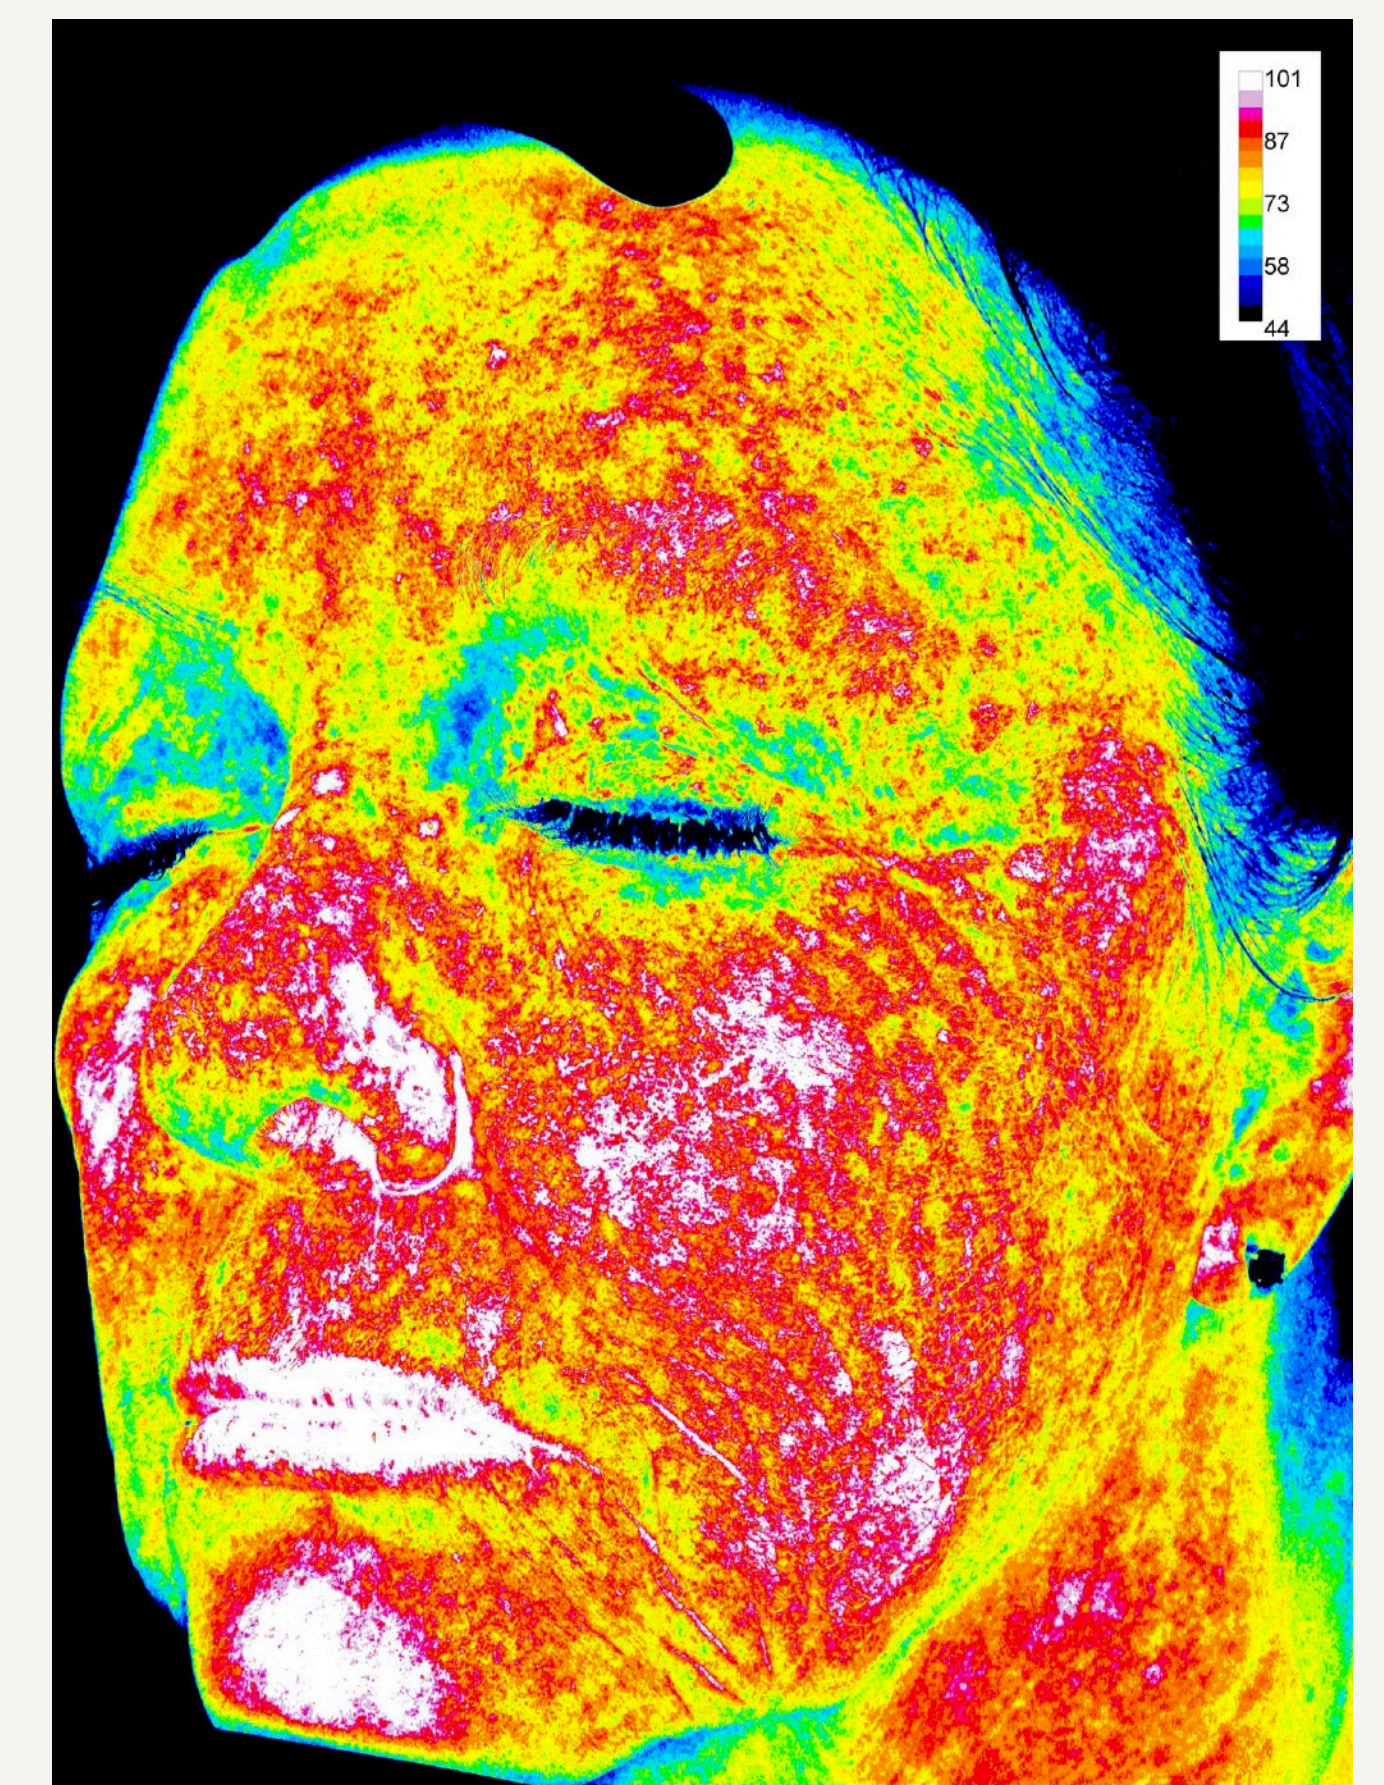

AFTER

AFTER

4. No Harsh Side Effects

**Based on a clinical study of 18 subjects using 0.5% Activated Silk 8A-α over a 28-day use period.

100%

Agree the product caused no noticeable skin flaking or peeling**

100%

Of participants said they saw a calming effect on the redness of their skin**

94%

Agree skin is not irritated by daily use of the product**
