

Medical Device Manufacturing

Achieve a next level clean
for your facility.

**NEXT
LEVEL
CLEAN**

The essence of
70 years forward
thinking:

NEXT
LEVEL
CLEAN

Everything we do grows from a constant dialogue with our customers. This made us a world leader in innovative cleaning solutions for controlled environments. We provide a complete contamination control concept including planning, trial programs, training and after sales care.

We believe in making people work smarter, not harder. That is why we focus on ergonomics, performance and design at every stage of the R&D phase, while using unique and patented technologies. All that to help you realise a higher standard, a **NEXT LEVEL CLEAN**, sustainably!

Listen, learn, lead worldwide.

Vileda Professional CE is a world leader in the manufacturing of contamination control products for critical cleanroom environments. We commit ourselves to quality and excellence, every Vileda Professional CE system offers the highest cleaning standards and minimizes risk to your core business. We work with you and your unique environment to maximize production output and ensure a next level clean in every aspect of your cleaning regime.

Our global medical device manufacturing partners are benefitting from our unique insight based, solution driven approach to the science of clean as we believe in a simple principle: The more we know about your facility, the better you clean. Our innovative mechanical cleaning solutions and systems are specifically designed for the stringent demands of cleanroom and critical environment decontamination.

Vileda Professional pioneered the development and launch of microfibre, now a complete gamechanger in mechanical cleaning technology. Our quality microfibre and more recently our unique 'micronfibre' base material delivers improved cleaning efficacy results in your mechanical cleaning and disinfection contamination control process. Our systems ensure your cleaning technicians clean smarter and faster, not harder achieving improved cleaning efficacy benchmarks.

With more than 70 years experience in mechanical cleaning, we work with our customers to develop rigorous contamination control and prevention processes and protocols. We understand with unique insight gained from our end users the demands our highly regulated industry requires. Medical device manufacturing is often conducted in non-aseptic controlled environments and ISO classified cleanrooms. Regardless of the targeted market for the medical device manufactured, your manufacturing facility must be maintained with effective mechanical cleaning procedures.

We invite you to work with our contamination control specialists to find the right system that best fits your individual needs. This has been perfected over many years of experience listening to our customers and understanding their pain points. With regulatory compliance as a mindset and at the forefront of our R&D processes, our mechanical cleaning systems and solutions are validated and certified by independent test institutes in line with IEST, ISO regulations and GMP standards.

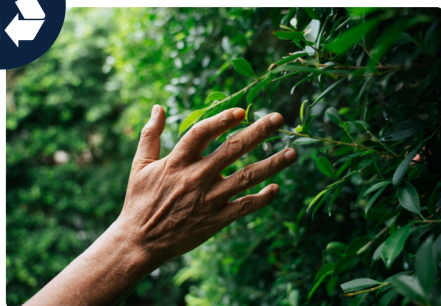

A partnership with us will ensure together we will take your facilities mechanical cleaning contamination control processes and protocols to the next level.

Contamination Control Prevention & Validation

Higher focus on ...

- Industry regulation compliance cGMP procedures compliance with 21 CFR 820 and Medical Device Regulation according to (EU) 2017/745 - internal and external audits.
- Next level mechanical cleaning quality control processes and programs, aimed at monitoring, managing and removing potential microbial contamination.
- Microbiological surveillance. Our cleaning systems and solutions help combat the presence of harmful microorganisms.

Sustainability

Socially responsible ...

- Products made with recycled & recyclable materials. A 'circular economy' mindset when developing our systems and solutions.
- High durability and launderability product features delivering longevity of use. Avoid the 'buy cheap, buy twice' scenario.
- Optimised cost in use model focuses on opportunity cost reductions. Utilities and waste reduction management are high on our sustainability KPI's.
- R&D focus to achieve carbon footprint KPI's.

Convenience

Maximising ...

- Cost control and long-term financial benefits. Investing in Vileda Professional CE can lead to long term added value benefits.
- Opportunity cost savings by using our patented pre-prepared systems and solutions.
- Faster more efficient cleaning, zero compromises on cleaning efficacy.
- Ergonomics, system and solutions design - one system, total facility clean capability.
- Ease-of-use, intuitive product design features and benefits.

Training & Services

Partnering with ...

- Customer insight-led approach leveraging manufacturing quality, safety and output. We listen, we learn, you benefit!
- Standardised best practices, together we deliver a Next Level Clean, sustainably!
- SOP development excellence, optimum mechanical cleaning performance - 24/7/365 days a year.
- Continuous training programs and certification and pre-audit support in conjunction with our contamination control specialists.

EvoControl™ 400

Maximize contamination control!
This wiper meets the highest demands of cleanroom wiping with unique Evolon technology. This provides revolutionary cleaning results that deliver strict contamination control protocols the medical device manufacturing industry demands.

Three solutions, one commitment: Next Level Clean

Vileda Professional CE offers innovative mechanical cleaning solutions that will enhance your contamination control cleaning and disinfecting process, as well as lower your overall costs.

CE MicroIntensive Duo

Proven performance, twice as efficient!
Double-sided, single-use mop designed exclusively for the patented Swep Duo™ mopping system in Controlled Environments. CE MicroIntensive Duo is the perfect microfibre mechanical cleaning solution for those looking to simplify and speed-up the cleaning process. Realising the benefits of a high-performance single use system, this system reduces the risk of cross-contamination facility wide.

CE Compact Trolley

Safer, cleaner and more convenient trolley cleaning system offering reduced risk of cross-contamination in controlled environments. This compact trolley solution utilizes full-sized pre-prepared buckets and boxes and can be neatly stored away underneath workstations and tabletops for total space optimization.

Unrivalled contamination control, biocontamination pickup and residue removal performance

Vileda Professional – a part of the Freudenberg Group

Vileda Professional provides innovative cleaning solutions for professional users in various application areas, such as General Building, Healthcare, HoReCa and Controlled Environment. With sales offices in all major European countries, in North America and Asia – and with a wide net of representatives – we are well located around the world. Vileda Professional belongs to the Freudenberg Group – a diversified, family-run global company, headquartered in Germany.
