

A close-up, high-contrast photograph of a woman's face, focusing on her nose, eyes, and lips. The image has a dark, moody aesthetic with a blue-grey tint. The woman's eyes are looking directly at the camera, and her lips are slightly parted, showing her teeth. The skin texture is visible, particularly around the nose and mouth.

Your Skincare Journey Begins Here

FP Labs and Federal Package are committed to developing top-quality skincare products with outstanding service. As the manufacturing landscape for skincare and personal care products changes, we are committed to providing a complete solution for your brand.

You demand the highest quality product possible, for your brand and your customers. Federal Package provides a variety of propel-repel container types, including our sustainable Eco Smart® platform and other sustainable options.

The team at FP Labs provides a wealth of creativity and experience to bring your formula to life. Our manufacturing processes provide efficient, consistent production. Robust in-house R&D, testing, and quality assurance capabilities ensure that you receive a safe, consistent, effective product every time, from start to finish.

Together, we make it yours.

Strength in Expertise

For more than 40 years, Federal Package has been the preferred contract manufacturer for leading beauty and personal care brands. Now as FP Labs, we handle everything from research and development, formulation, blending and filling, decorating, retail-ready packaging, and beauty containers.

We are certified organic and FDA-regulated. From lip care, face and body lotions, sun care, deodorants, and more, together we make it yours.

We are the go-to source for companies in the health, beauty, and cosmetic industries searching for complete turnkey solutions in contract manufacturing.

What is turnkey manufacturing?

Making Your Cosmetic Vision a Reality

With a relentless commitment to quality, innovation, and sustainability, FP Labs stands at the forefront of the contract manufacturing industry for skincare solutions.

We understand that your brand is unique, with its own vision and identity. That's why we offer a comprehensive suite of customizable services, allowing you to tailor ingredients, formulations, and performance to your exact specifications. Whether it's a luxurious anti-aging serum, a soothing lip balm, or a revitalizing moisturizer, we have the expertise and resources to bring your vision to life.

Safe, Transparent, and Effective Skincare

At FP Labs, we employ rigorous practices to develop over the counter (OTC) products with active pharmaceutical ingredients. Safety and efficacy are hallmarks of our production.

Our team of experienced formulators, chemists, and skincare experts then collaborate closely to develop formulations that marry cutting-edge science with safe, proven skincare applications.

We meticulously select the finest ingredients, sourced responsibly from trusted suppliers. Each product undergoes rigorous testing and refinement to ensure unparalleled efficacy and safety.

A World of Opportunity Awaits

At FP Labs, our mission is to create skincare products that deliver real results. By combining rigorous research, testing, and quality control, we ensure that every product meets the highest standards of excellence.

Our Crafted program for cosmetics and Bespoke program for actives and OTCs puts your brand in the driver's seat of formula creation to craft a product that is truly yours.

We employ a team of experienced researchers and chemists who are dedicated to providing the highest quality skincare technology to provide your brand with a unique formulation. FP Labs takes pride in its commitment to delivering outstanding skincare product development that exceeds industry standards.

Where Precision Meets Beauty

Customization is at the heart of our production. We offer complete manufacturing options at every stage of your brand's product development.

Technology Transfers

FP Labs makes formula transfers easy. Our responsive team has the talent and technology to transition your product. Our years of experience enable us to match, modify, or customize your existing product from formulation, to containers or retail-ready packaging.

Our team will meet you anywhere on your brand's skincare journey.

Stock Formulas That Inspire

FP Labs offers a selection of stock formulations meticulously vetted and rigorously tested for high-performance skincare results. Our R&D and quality control professionals put our formulas through a strict evaluation to ensure efficacy, safety, and compatibility.

With FP Labs' stock formulations, you elevate your brand with trusted, science-backed skincare offerings that inspire confidence and satisfaction among your most discerning consumers.

Sustainability at Your Fingertips

Sustainability shouldn't come with additional costs. The Federal Package Eco Smart® platform of propel and repel containers allows brands to utilize plastic components that are designed to break down in biologically active environments.

We also have the option to use Post-Consumer Recycled Resins (PCR), Post-Industrial Recycled Resins (PIR) and Plant Based Bio-Resins. We also feature “light weighting” on some containers that reduces the overall amount of material used.

Our sustainable packaging is the solution to limit your environmental impact without sacrificing form, fit, or function to improve your bottom line.

Have your own sustainable container design? We can fill a variety of refillable, paper, aluminum, plastic, or glass containers.

Where It All Begins

RESEARCH & DEVELOPMENT

As an end-to-end contract manufacturer specializing in personal care formulation, our chemistry staff conducts extensive research and development for our clients. Our on-site laboratory allows us to reduce time-to-market by expediting the custom formulation and manufacturing process.

All formulations are tested according to the highest quality standards using state-of-the-art equipment and technology. We are well known for our ability to reformulate difficult cosmetic combinations, revise and enhance existing formulations.

If you need assistance with reformulation or developing a new formula, contact one of our solution experts.

Safety at Every Stage of Production

ANALYTICAL & MICROBIOLOGY LAB

FP Labs offers analytical and microbiology laboratory services for the assessment of personal care product formulas. Our fully instrumented laboratory has the capability to perform a broad range of analyses on raw materials, compounded bulk, and finished formulations.

We assure brand compliance with our robust internal controls and protocols.

Skincare Done Well

FP LABS PRODUCTS

FP Labs is proud to be one of premier skincare producers in the nation. Our expertise in anhydrous, “hot pour” formulations provide a smooth, luxurious feel to a variety of products.

We specialize in organic, vegan, and natural formulations to help bolster your sustainability bottom line.
