

Cell & Gene Therapy

Achieve a next level clean
for your facility.

The essence of 70 years forward thinking:

NEXT LEVEL CLEAN

Everything we do grows from a constant dialogue with our customers. This made us a world leader in innovative cleaning solutions for controlled environments. We provide a complete contamination control concept including planning, trial programs, training and after sales care.

We believe in making people work smarter, not harder. That is why we focus on ergonomics, performance and design at every stage of the R&D phase, while using unique and patented technologies. All that to help you realise a higher standard, a NEXT LEVEL CLEAN, sustainably!

Listen, learn, lead worldwide.

Vileda Professional CE is a world leader in the manufacturing of contamination control products for critical cleanroom environments. We commit ourselves to quality and excellence, every Vileda Professional CE system offers the highest cleaning standards and minimizes risk to your core business. We work with you and your unique environment to maximize production output and ensure a next level clean in every aspect of your cleaning regime.

Our global cell and gene therapy partners are benefitting from our unique insight based, solution driven approach to the science of clean as we believe in a simple principle: The more we know about your facility, the better you clean. Our innovative mechanical cleaning solutions and systems are specifically designed for the stringent demands of cleanroom and critical environment decontamination.

Vileda Professional pioneered the development and launch of microfibre, now a complete gamechanger in mechanical cleaning technology. Our quality microfibre and more recently our unique 'micronfibre' base material delivers improved cleaning efficacy results in your mechanical cleaning and disinfection contamination control process. Our systems ensure your cleaning technicians clean smarter and faster, not harder achieving improved cleaning efficacy benchmarks.

With more than 70 year's experience in mechanical cleaning, we work with our customers to develop rigorous contamination control and prevention processes and protocols. We understand with unique insight gained from our end users the demands our highly regulated industry requires.

Cell and gene therapy has been recognised as an effective form of patient treatment with various life-threatening conditions in recent times. As the popularity of this hi-tech treatment increases around the globe, research to develop and deliver these treatments has accelerated at pace. In order to do that safely and effectively aseptic controlled environments are critical to its success.

We invite you to work with our contamination control specialists to find the right system that best fits your individual needs. This has been perfected over many years of experience listening to our customers and understanding their pain points. With regulatory compliance as a mindset and at the forefront of our R&D processes, our mechanical cleaning systems and solutions are validated and certified by independent test institutes in line with IEST, ISO regulations and GMP standards.

A partnership with us will ensure together we will take your facilities mechanical cleaning contamination control processes and protocols to the next level.

Contamination Control Prevention & Validation

Higher focus on ...

- Manual mechanical cleaning systems and solutions, specifically designed for rigorous aseptic processing conditions.
- Pass-through cleaning capabilities reducing the risk of cross contamination and ensuring disruption free operations in your facility.
- Cleaning versatility and adaptability to a range of CGT manufacturing processes. We will have a solution to meet your needs.

Sustainability

Socially responsible ...

- Sterile and multi-pack and refill mopping options that reduce plastic packaging waste by 70% and helping to reduce opportunity costs in your facility.
- Durable, re-usable mops certified sterile with external global partners specializing in the cleanroom laundering industry.
- Optimized cost-in-use model unique to Vileda Professional CE to help reduce chemical, water and materials spend. Time also can be saved in cleaning hours so you can redeploy those saved hours somewhere else in your facility.

Convenience & Automation

Maximizing ...

- Opportunity cost savings. Chemical and water savings with Preprep dosing system for modular cleanrooms without drainage systems.
- Space-savings and efficiency with tools designed for cleanrooms with limited or no storage space. Small footprint systems and solutions where sq. mtr space is limited.
- Ergonomic, quick and easy to use cleaning systems and solutions ideally suited for point-of-care manufacturing.

Training & Services

Partnering with ...

- Compliance counselling and best practice, in partnership with IEST, PDA, FDA, and cGMP standards.
- Comprehensive and regular after sales consultation and training to help you achieve a Next Level Clean in your facility.

Three solutions, one commitment: Next Level Clean

Vileda Professional CE offers innovative mechanical cleaning solutions that will enhance your contamination control cleaning and disinfecting process, as well as lower your overall costs.

CE Compact Trolley

Safer, cleaner and more convenient trolley cleaning system offering reduced risk of cross-contamination in controlled environments. This compact trolley solution utilizes full-sized pre-prepared buckets and boxes and can be neatly stored away underneath workstations and tabletops for total space optimization.

CE MicroIntensive Duo

Proven performance, twice as efficient! Double-sided, single-use mop designed exclusively for the patented Swep Duo™ mopping system in Controlled Environments. CE MicroIntensive Duo is the perfect microfibre mechanical cleaning solution for those looking to simplify and speed-up the cleaning process. Realising the benefits of a high-performance single use system, this system reduces the risk of cross-contamination facility wide.

EvoControl™ 400

Maximize contamination control! This wiper meets the highest demands of cleanroom wiping with unique Evolon technology. This provides revolutionary cleaning results that deliver strict contamination control protocols the medical device manufacturing industry demands.

Unrivalled contamination control, biocontamination pickup and residue removal performance

Vileda Professional – a part of the Freudenberg Group

Vileda Professional provides innovative cleaning solutions for professional users in various application areas, such as General Building, Healthcare, HoReCa and Controlled Environment. With sales offices in all major European countries, in North America and Asia – and with a wide net of representatives – we are well located around the world. Vileda Professional belongs to the Freudenberg Group – a diversified, family-run global company, headquartered in Germany.
